

Reduced delivery time - NVOC

Eurofins Pharma reduces delivery time for chemical analysis of water samples from 10 to 3 working days following client requests for faster answers. The improved delivery time is the result of 12 months streamlining efforts in the chemical lab

- Optimal sampling vials have been identified and validated
- Time for sample in-flow, registration and processing has been reduced
- Quality assurance is streamlined
- New equipment is installed and validated
- Back-up strategy solidified. Two individual analytical equipments at Eurofins Pharma. Furthermore, third analytical equipment, qualified at Eurofins cGMP sister laboratory

We are looking forward to offer our existing and new clients the improved services starting from October 1st 2010.

Services covered:

- NVOC
- Conductivity
- Nitrates
- Heavy metals

Samples received before 3 pm are reported within the next 3 working days.

Microbiological water analysis services continue at the absolute minimum possible delivery time and we offer total water analysis packages.

We look forward to continue the analysis of water samples for our many satisfied clients and welcome new clients who want to reduce turn around times for analytical services.

Eurofins Pharma is approved by the Danish Health Agency and registered by FDA.

With kind regards,
Eurofins Pharma A/S

Planned Eurofins newsletters

- Cleaning validation of production lines
- New opportunities for microbiological identifications with Eurofins (Microseq)
- cGMP analysis of environmental pollutants, (pesticides, dioxins, trace metals, vitamins)
- Update on USP / EP upcoming changes of metal analysis requirements
